DELLA MARTA

Ricerche ed innovative, le vetrine climatizzate per il vino Della Marta rappresentano quanto di più rivoluzionario sia mai stato ideato nel seducente mondo degli appassionati di vino. Sono oggetti dal concept e design inconfondibile, trasformati negli anni in veri e propri simboli e destinati a diventare preziose icone senza tempo.

La collezione dedicata alla casa è stata disegnata da Massimo Della Marta, designer e grande appassionato di vino, ispirato da una visione completamente nuova. La vetrina del vino non è più inserita nella cucina ma è integrata nello spazio living, luogo per eccellenza riservato al relax, al piacere della compagnia ed alla convivialità.

Le vetrine della collezione professionale sono state scelte dai più grandi sommelier, chef e manager horeca per arredare i propri ristoranti ed hotel in tutto il mondo.

Le vetrine climatizzate per vino Della Marta sono le vetrine ufficiali dell'Associazione Italiana Sommelier.

Per la prima volta, le cantine climatizzate per il vino non sono semplici frigoriferi, ma raffinati complementi di arredo, che si integrano in modo armonico e con eleganza in qualsiasi ambiente.

L'eccellente qualità che l'azienda propone da sempre è ottenuta applicando un sistema di produzione che prevede congiuntamente processi produttivi industriali e lavorazioni artigianali. Ogni prodotto viene costruito da tecnici specializzati utilizzando materie prime e semilavorati di altissima qualità e ponendo particolare cura per ogni dettaglio.

Le vetrine Della Marta sono costruite interamente in Italia, nello stabilimento di Rivoli, alle porte di Torino.

Sophisticated and innovative, Della Marta's climate-controlled wine cabinets represent what is most revolutionary ever conceived in the seductive world of wine enthusiasts. They are objects with an unmistakable concept and design, which over the years have been made into real symbols and are destined to become precious, timeless icons.

The collection dedicated to the home was designed by Massimo Della Marta, a designer and a great wine lover, inspired by a completely new vision. The wine cabinet is no longer placed in the kitchen but is integrated within the living space, a place par excellence reserved for relaxation, the pleasure of company and conviviality.

The cabinets from the professional collection have been chosen by top sommeliers, chefs and horeca managers to furnish their restaurants and hotels around the world.

Della Marta climate-controlled wine cabinets are the official cabinets of the Italian Sommelier Association.

For the first time, climate-controlled cabinets are not simple refrigerators but refined furnishing complements capable to elegantly integrate into any environment.

The excellent quality that the company proposes has always been achieved by applying a production system that jointly involves industrial production processes and craftsmanship. Each product is built by specialized technicians using raw materials and semi-finished products of the highest quality, and by paying close attention to every detail.

Della Marta cabinets are made entirely in Italy, in the Rivoli factory on the outskirts of Turin.

TECA

La Teca si presenta sobria ed elegante, volutamente minimalista ed essenziale. L'ampia superficie vetrata mette in risalto l'originale esposizione orizzontale delle bottiglie, creando una suggestiva scenografia. L'impianto di refrigerazione centrale non altera gli equilibri estetici, si integra in modo discreto e, come per magia, assume la forma di un elegante portabottiglie.

Le temperature differenziate consentono di conservare sia vini bianchi che vini rossi a una temperatura ideale, con la garanzia che ogni bottiglia sia sempre pronta per ogni occasione.

Teca is sober and elegant, deliberately minimalistic and essential. Its broad glass surface emphasizes the original horizontal bottle display, creating a suggestive scene. The refrigeration system does not alter its aesthetic balance, it integrates discreetly and – with a touch of magic – turns into an elegant bottle holder.

Differentiated temperatures allow both white and red wines to be stored at an ideal temperature, with the assurance that each bottle is always ready for any occasion.

MOD

Sistema componibile. Una ricca collezione di finiture e colori consente di realizzare ambientazioni originali ed esclusive.

Mod è un sistema versatile, che trova spazio in progetti di abitazioni private e locali commerciali. Esposizione, conservazione e servizio del vino, ma non solo. L'inserimento di moduli gastronomia e salumeria consente di realizzare una pratica, elegante e ben distinta area dedicata esclusivamente all'esposizione enogastronomica.

Modular system. A rich collection of finishes and colors to create unique and exclusive ambiances.

Mod is a versatile system that finds its place in private residential and commercial projects.

Wine display, storage and service, but not exclusively. The addition of ready dish and cold cuts modules enables the creation of a practical, elegant and distinct area dedicated exclusively to food and wine display.

EMME 12

La Emme12 rappresenta la sintesi della vision del brand. Oggetto fortemente identitario, segue il concept estetico della collezione Quadro Vino, facendo propria una tecnologia del freddo professionale. È la vetrina per vino meno profonda al mondo. Le temperature differenziate consentono di conservare contemporaneamente sia vini bianchi che vini rossi.

Emme 12 represents a synthesis of the brand's vision. As a highly identitary object, it follows Quadro Vino's aesthetic concept, taking up technology from professional refrigeration.

It is the world's slimmest wine cabinet. Differentiated temperatures allow for conservation of white and red wines at the same time.

QUADRO VINO

Design, eleganza ed armonia in un oggetto semplicemente unico. L'esposizione orizzontale delle bottiglie è ordinata e disegna una raffinata scenografia.

Le temperature differenziate consentono di conservare contemporaneamente sia vini bianchi che vini rossi.

La cornice in legno ed il pannello interno in metallo o ecopelle sono personalizzabili con finiture e colori diversi.

È la vetrina climatizzata per vino meno profonda al mondo, integrabile con semplicità anche in spazi ridotti.

Design, elegance and harmony in a simply unique object. The horizontal display of bottles is neat and paints a refined scene.

Differentiated temperatures allow both white and red wines to be stored at the same time.

The wooden frame and metal or eco-leather interior panel can be customized with different finishes and colors.

It is the world's least deep climate-controlled wine cabinet, which can be easily integrated even in tight spaces.
