NEVADA | cool appliances

Nevada is a leading Italian brand in the production of wine cellars for wine storage.

They are designed and studied in Italy to obtain a reliable, design, innovative product, suitable for every design need.

With more than 20 years of experience in the field, Nevada offers a wide range of products for both domestic and professional use.

The wide range allows the insertion in any type of project in the kitchen, in a living area or in a public place: bar, restaurant and wine bar.

Quality Control is one of our strengths, each product is tested and checked by a team of experts before being packaged and shipped to ensure maximum reliability.

Service is guaranteed throughout the country by our after-sales service department, which guarantees prompt action in case of malfunction or accidental breakage over time.

Products are in prompt delivery and distributed throughout Italy by a network of specialized dealers.

● NEVADA IS SYNONYMOUS WITH:

Quality: products made with the best materials and technologies.

Reliability: a solid and reliable company with a service presence throughout Italy.

Innovation: Nevada is constantly evolving, seeking new innovative solutions to improve wine storage and offers an increasingly complete and functional user experience.

Design: Nevada wine cellars enhance the beauty of bottles, making the wine cellar a truly elegant and modern piece of furniture suitable for any type of environment.

● OUR PHILOSOPHY:

Nevada's commitment is to create products that allow people to enjoy their own space, alone or in company, in a warm and elegant environment that conveys emotions to themselves, their family members and guests.

Our dream is to create a project that is not limited to mere production and sales but that can promote values that are evoked by the product that these wineries are designed to preserve: WINE.

Wine is passion, celebration, truth, culture, history, friendship, love and is a Fil Rouge that unites all peoples!

● TECHNICAL PARTNER:

We have renewed our collaboration with Gambero Rosso as a Technical Partner .

GUIDE FOR CHOOSING YOUR WINE CELLAR WINE

HOW TO CHOOSE YOUR WINE CELLAR REFRIGERATOR

A number of key variables certainly need to be taken into consideration:

Where do I want to place it?

How many bottles do I want to store?

How many temperatures do I need for different types of wine?

Do I need it for home or professional use?

Nevada's wide range allows it to meet most needs!

● POSITIONING:

Wine Cellar | Free Standing Design Wine Cellar for a Sophisticated Living Environment

4 door 90 refrigerator with wine cellar | Multifunctional Free-standing Kitchen with built-in Cellar Fridge

Built-in | Wide range that integrates perfectly within kitchen columns

Udertop | Wine cellars suitable for placement in the kitchen under the Top or Free standing

Column-integrable | Wine cellars suitable for placement between kitchen columns or Free Standing

Wineries Vinum Design | Free Placement Wineries

● DIMENSIONS | MEASUREMENTS ?

The NEVADA catalog shows the dimensions of each wine cellar to facilitate proper kitchen design using built-in models and proper placement for free-standing wine cellars.

● HOW MANY BOTTLES ?

The maximum capacity is expressed in "Standard Bordeaux" type bottles. The number of bottles shown in the catalog takes as reference the 750-ml Classic Bordeaux (sizes H 30mm and Ø 70 mm.) **Any other type of bottle changes the capacity.**

Most wine cellars are equipped with solid wood slatted shelves. All wooden shelves are removable and removable so that there is more space to hold any large bottles such as magnums or bottles with unconventional shapes.

● SINGLE, DOUBLE OR TRIPLE TEMPERATURE ?

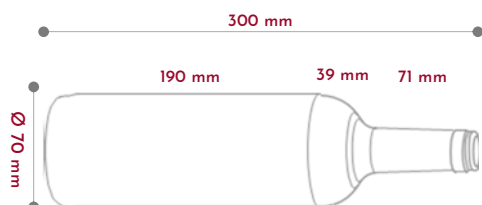

Single temperature is suitable for the storage or pouring of only one type of wine. All white or red, two or more temperature cellars allow storage or pouring of both white and red wine in several separate zones. Not all wine cellars have totally independent temperature zones. Check well the minimum and maximum temperatures provided for each zone.

● HOME USE OR PROFESSIONAL USE ?

Granted that each model can be installed in both a home and a professional environment the built-in range is definitely designed to be perfectly installed inside kitchen cabinets. The VINUM DESIGN range, on the other hand, is designed for use in a professional environment but is also perfectly suited for home use.

BOTTLES IN THE CELLAR

STANDARD DRAWERS DESIGNED TO HOLD 750ML BORDEAUX BOTTLES

Originating in Bordeaux (hence its name) it contains both white and red wines. In the former case it is almost always clear glass, in the latter it is mostly dark green.

Features :

Base: Poorly Pronounced

Body: Cylindrical Diameter from 7 to 8 Cm

Shoulder: Very Pronounced

Neck : Short

Capacità: 750 Ml.

SOME TYPES OF BOTTLES

There are numerous types of bottles in the market, differing in size and shape. From the most common and widespread Bordeaux bottles to magnums. The collection of Nevada[®] wine cellars has numerous bottle drawers, which can be configured according to the bottles to be stored.

THE RIGHT TEMPERATURE

Even a simple bottle of wine must have its proper location and temperature.

DOLCI

Sweet o Passiti 12°C | 14°C

DELLA MARTA

FOR

NEVADA

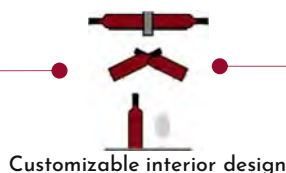

DELLA MARTA
FOR
NEVADA®

From the collaboration with Della Marta comes a Design wine cellar made with exclusive finishes for Nevada. Della Marta is a world-leading Italian manufacturer of wine cellars for professional and domestic use.

A unique, customizable product for wine and Design lovers designed to be placed in a refined environment to embellish the dining room or living area of the home. The depth of only 39 cm and the sliding doors, make this wine cellar easily placeable in any furnishing project.

The Wine Cellar allows you to **customize the interior to suit your needs** by choosing from several types of bottle placement .

Depending on the size of the bottles and the interior arrangement, the capacity may vary from a minimum of about 56 to a maximum of 64 bottles.

Thanks to the different bottle holders, your collection will always be in plain sight

This Wine Cellar allows cooling to be set in **Static or Ventilated cooling mode**:
Ventilated | the temperature is the same throughout the cavity ;
Static | the temperature stratifies according to the degrees set from a minimum in the lower zone to a maximum in the upper zone allowing proper storage of different types of wine .

Finishing made **Exclusively for Nevada**.
The outer frame is made of durable epoxy paint in matte black and the front panel with MDF painted in Black RAL 9005.

Internally, the structure is made entirely of aluminum also epoxy powder coated in Anodic Bronze finish.

Always well-lit interiors thanks to the Dynamic White **LED Internal Light that can be customized** in temperature from 2700 to 6000 K via a convenient **remote control** included.
Thanks to the powerful 2000 Lumen/m **full-height vertical dual-emission** interior lighting, your bottles will always remain clearly visible.

Control the wine cellar at any time with the ConneX app, an application that allows the user to be able to **control and change, even remotely and in real time, the temperatures and settings of the display cases**.
The app also allows the user to take advantage of weekly reporting services and alerts via push messages and email.

Measures: free standing installation

Nevada presents an absolute novelty in the world of 90 cm free-standing refrigerators: the 4 Doors with Freezer and Wine Cellar.

A Fridge with large storage capacity with **Three different refrigeration zones**, one of which is dedicated exclusively to wine.

It is a unique product that stands out for the quality of its interior and exterior finishes, dedicated to those looking for a **multifunctional** product with large capacity, low consumption and low noise.

The totally No Frost refrigerator area features an elegant rear satin stainless steel panel and crystal shelves perfect for accommodating trays up to 79 cm wide.

The No Frost freezer has 3 drawers and 3 small balconies in the counter door.

The elegant wine cellar can accommodate up to a maximum of **34 75 cl bottles**. Bordeaux type, and is perfect for wine storage thanks to the **activated charcoal filter** and **Anti-UV Triple Glass** door.

The 382-liter refrigerator compartment has two sliding fruit and vegetable drawers and large balconies.

Functions Available: Rapid Cooling and Freezing, Holiday Mode, Economic Mode, Open Door Alarm.

Dedicated **Interior Red Lighting System** for each compartment makes all spaces visible and easily accessible, both day and night

The freezer can reach temperatures **from -15°C to -25°C**. Through the Display you can activate the **Fast Freezing Function** which automatically sets the lowest temperature to freeze your food in the shortest possible time.

The Cellar Compartment should be considered for the pouring of Red Wines in addition to the refrigerated compartment used for White Wines. Alternatively for the storage of Wines in the medium | long term.

Premium **Black Metal** Door Finish.
Black Metal Sides

Modern Touch Display allows you to control the temperature and various functions of the refrigerator directly on the door. This avoids the need to open and close the refrigerator with a possible negative impact on the temperature.

The **Total No Frost Function in the refrigeration area** reduces the formation of mold and bacteria and prevents excessive condensation by automatically adjusting the humidity inside.

Full-length collar opening with **No Handle**.

The **Total No Frost Function prevents the formation of ice** by enabling more convenient management, as there is no need to periodically defrost the freezer.

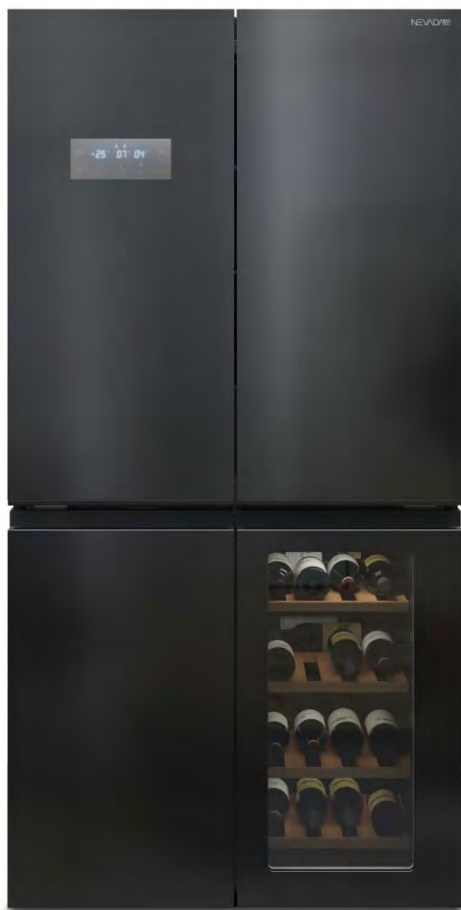

Exclusive Wine Cellar

Compartment Dedicated to your passion, holds up to approx. **34 bottles** of 75 Cl. Bordeaux type.

Preserves your bottles in the best possible way thanks to the dedicated wooden shelves for wine storage, your bottles will always be convenient to take out thanks to the two upper shelves equipped with the **sliding system on telescopic guides**.

Adjustable temperature from 5 | 18°C via the door display.

Internal activated carbon filter, Top-emitting LED lighting and Anti-UV Triple Glass Door

TYPES OF AERATION:

STANDARD VENTILATION

For proper operation of the wine cellar, a **front ventilation grille on the plinth** must be provided, along with the **rear ventilation chimney** on the bottom of the cabinet to exhaust hot air

SELF-VENTILATED VENTILATION

Self-ventilated models incorporate a system that allows air to enter and exit via a front grille located behind the cellar door, facilitating installation.

The Range of **Standard Built-in** Nevada Wine Cellars presents the widest choice of heights on the market to offer maximum design flexibility, in particular we highlight the new 72 cm high **Semi-Self-ventilated** model for installation in column and undercounter and the new 105 cm high model for perfect side-by-side with the 45 cm oven and microwave column. Perfect operation is guaranteed by the installation of the lower grill in the plinth and the rear ventilation chimney.

The top of the range of the series is represented by the 178 cm model that can be triple-temperature **Red | White | Champagne** with the black glass door and the double-temperature model in Panelable version with **Push Open Door** Automatic Opening System. All the range of wine cellars are equipped with Ghost Concealed Handle, an exclusive and elegant solution to avoid the presence of a cumbersome handle without the need for an electric opening system .

The simple and intuitive control interface, equipped with Touch controls and illuminated Displays, makes it easy to set and adjust internal temperatures. Depending on the model, it will allow the adjustment of one temperature to a maximum of three for the most capacious ones

Always well-lit interior thanks to the **LED interior light with dual horizontal light emission**, your bottles will always be clearly visible.

All range of Standard built-in cellars are equipped with Full Glass black glass door with **retractable handle called GHOST**, depending on the model it will be positioned vertically or horizontally. Insulated against harmful UV rays, the doors are equipped by **double or triple low-e glass**

To ensure optimal air quality at all times, most standard built-in models are equipped with **Activated Carbon Filter**, which eliminate odors that can affect the taste of wine and protect bottle corks from mold and bacteria.

All interior **Shelves are made of fine wood**, and most models have Shelves on **telescopic rails** that facilitate the insertion and removal of bottles.

The Range of **Self-ventilated Built-in** Wine Cellars are born to meet the requirements of the most demanding customers in terms of Design and performance. In fact, these wine cellars are equipped with an **integrated ventilation system**; air entry and exit is through a front grille located behind the door, this allows it to be installed easily, with no grilles in the kitchen plinth and no rear spaces for hot air to escape.

With an elegant and minimalist Design, these wine cellars are the ideal solution for kitchens designed without handles, thanks to the innovative **Push Open | Close Door** opening system that allows the door to be opened with a slight pressure in the upper corner opposite the hinge. To complete the range in the heights of 60 and 72 we have included two **Panelable** models that allow the perfect integration of the wine cellar inside the kitchen with the installation of the frame in the same finish as the doors used in the kitchen.

Recall that the 60 and 72 cm Self-ventilated models can also be perfectly installed under the kitchen top.

Black Full Glass door with no visible handle and Triple Low-Emission Glass w/gas Argon to protect your wines from harmful UV rays. Thanks to **Hettich's** durable hinges and innovative **Push to Open | Soft Close** system, with a slight pressure the door will open automatically.

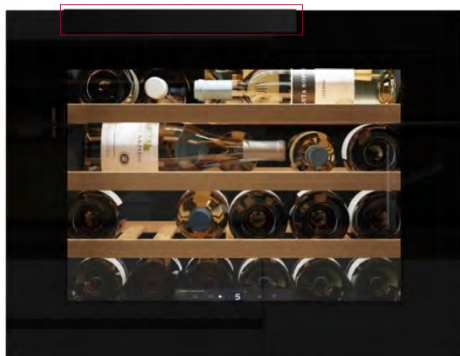

Interior always well-lit thanks to the **LED interior light** with dual vertical and horizontal light emission

Customize your wine cellar by choosing from **9 different light colors** and adjust the **light intensity** to your liking so that your bottles are always clearly visible.

The Range of Self-ventilated Wine Cellars are equipped with **Inverter Compressors** that guarantee not only **quieter operation, longer life and low energy consumption**, in fact they are all in energy class F.

All interior **Shelves** are made of fine wood and thanks to the **telescopic guides with Total extraction**, the shelves are easily removable, facilitating the insertion and removal of bottles.

To ensure optimal air quality at all times, Nevada wine cellars are equipped with **Activated Carbon Filter**, which eliminate odors that can affect the taste of wine and protect bottle corks from mold and bacteria.

Wooden Shelf for Pouring

Wooden Storage Shelf

Push to Open Panelable door equipped with Hettich hinges with Soft Open | Soft Close opening mechanism

Always well-lit interior thanks to white LED interior light with double vertical full-height light emission, your bottles will always remain clearly visible

All interior Shelves are made of fine wood and offer different types of use, so you can always store your wine at its best.

Thanks to the telescopic guides, the shelves can be easily pulled out, making it easier to insert and remove bottles

Wooden Shelf for Pouring

The new multi-purpose wooden shelf allows maximizing the capacity of bottles inside. It allows use both for storing wine horizontally and if necessary, by tilting the slats, transforming it into a wine-pouring shelf.

Exclusive Sommelier Set Shelf

Thanks to the sommelier set you will amaze your guests by professionally decanting the finest wines. With the new Sommelier Set you always have all the complete tools at hand.

The Shelf offers other conveniences: enjoy champagne and white wine in chilled glasses and keep wine bottles at the perfect temperature once opened.

Wooden Storage Shelf

Store your bottles at their best with the dedicated wine storage shelf, your bottles will always be convenient to take out thanks to the sliding system on telescopic slides.

The Range of Nevada wine cellars with **Undercounter** installation are perfect to be installed under the kitchen top between the base cabinets allowing, thanks to the various widths available, a good flexibility of use.

The Undercounter wine cellars, with the exception of NW9S, are equipped with **Removable Front Grid** that allows the installation of the kitchen plinth without interruption, for proper operation will be to provide a grid/milled for the passage of front air. This solution involves the elimination of the lock.

The wine cellars of this line offer maximum flexibility of use in any other environment being to all intents and purposes from **Free Standing**, the range offers single or double temperature models that can possibly be placed side by side.

The range features the exclusive **NO HANDLE** side groove that allows perfect matchability and reduces to zero the size of the handle

Professional performance thanks to the advanced control with **Lcd Touch Display** that allows you to easily manage the internal temperature Maximum Flexibility of use thanks to the **Independent Dual Temperature**, you can adjust the temperature from **+2°C to +20°C** to your liking in every cellar compartment

Always well-lit interior thanks to the full-height **LED interior** light with dual **horizontal and vertical light emission**. Customize your wine cellar by choosing from **3 different light colors**, your bottles will always remain clearly visible.

New elegant and minimalist **Black Full Glass** door with **NO HANDLE** hidden side groove.

Wooden Shelf for **Pouring**

The new **multi-purpose wooden shelf** allows maximizing the capacity of bottles inside. It allows use both for storing wine horizontally and if necessary, by tilting the slats, transforming it into a wine-mixing shelf.

UV Rays are harmful, they can cause chemical reactions in wines, so the Door is equipped with a **Triple Low-Emission Glass** so as to better protect your wines.

Front Grille with Key Lock

To allow the front passage of the kitchen plinth without any interruption, at the basement the front grille can be removed losing the use of the lock. A ventilation grille should be provided in the Plinth.

COMBINATION **TRIPLE** TEMPERATURE

H 180 cm

Configuration example:

TRIPLE TEMPERATURE

Formed by two cellars in side-by-side integral installation or free standing.

Cellar consisting of :

- 1 NNW180-150S-BFG
- 1 NNW180-150D-BFG

COMBINATION **QUADRUPLE** TEMPERATURE

Configuration example:

QUADRUPLE TEMPERATURE

Formed by two cellars in side-by-side integral installation or free standing.

Cellar consisting of:

- 1 NNW180-150D-BFG-NH
- 1 NNW180-150D-BFG-NH

The Range of Nevada wine cellars with **Integral or Free-standing** installation are perfect for long-term storage of a large number of bottles thanks to the large capacity, which can be further expanded by adding the dedicated Kit that brings the capacity to a maximum of approx. 180 Bordeaux-type 75 cl Bottles.

Thanks to the **front air ventilation at the inlet and outlet**, these wine cellars can be **integrated into kitchens** because they are equipped with a front grille for air ventilation, attention should be paid to the fact that the depth is about 70 cm and therefore it is likely that the door is not aligned with the kitchen doors .

Always well-lit interior thanks to the full-height vertical dual **LED interior light**.
Customize your wine cellar by choosing from **3 different light colors**, your bottles will always remain clearly visible.

New elegant and minimalist Black Full Glass door with **NO HANDLE** hidden side groove.
Version -NH

Professional performance thanks to the advanced control with **Lcd Touch Display** that allows you to easily manage the internal temperature

Maximum Flexibility of use thanks to the **Independent Dual Temperature**, you can adjust the temperature from **+2°C to +20°C** to your liking in every cellar compartment

UV Rays are harmful, they can cause chemical reactions in wines, so the Door is equipped with a **Triple Low-Emission Glass** so as to better protect your wines.

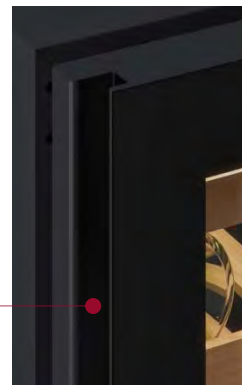

To ensure optimal air quality at all times, Nevada wine cellars are equipped with **Dual Activated Carbon Filters**, which eliminate odors that can affect the taste of wine and protect bottle corks from mold and bacteria.

Wooden Shelf for **Pouring**

The **new multi-purpose wooden shelf** allows maximizing the capacity of bottles inside. It allows use both for storing wine horizontally and, if necessary, by tilting the slats, transforming it into a shelf for pouring wine.

All Integral models are equipped with a **key lock**, so you can protect and control access to your fine wine collection.

OPTIONAL ADDITIONAL EQUIPMENT OPTIONAL D | List € 450

Capacity Approx.	Capacity for about 150 bottles
No. Internal Shelves	Approx. 180 (75 Cl. Bordeaux type)
Shelves	6 Sliding shelves
Shelves Type	3 Wooden shelves for Pouring
	3 Wooden Storage Shelves

Thanks to the **Optional Kit D** specifically for the Double Temperature version, it allows to increase the capacity of the wine cellar by adding to the standard equipment 6 Internal Shelves, the capacity increases from approx. 150 bottles to approx. 180 Bottles

NNW180-150D-BFG | NH

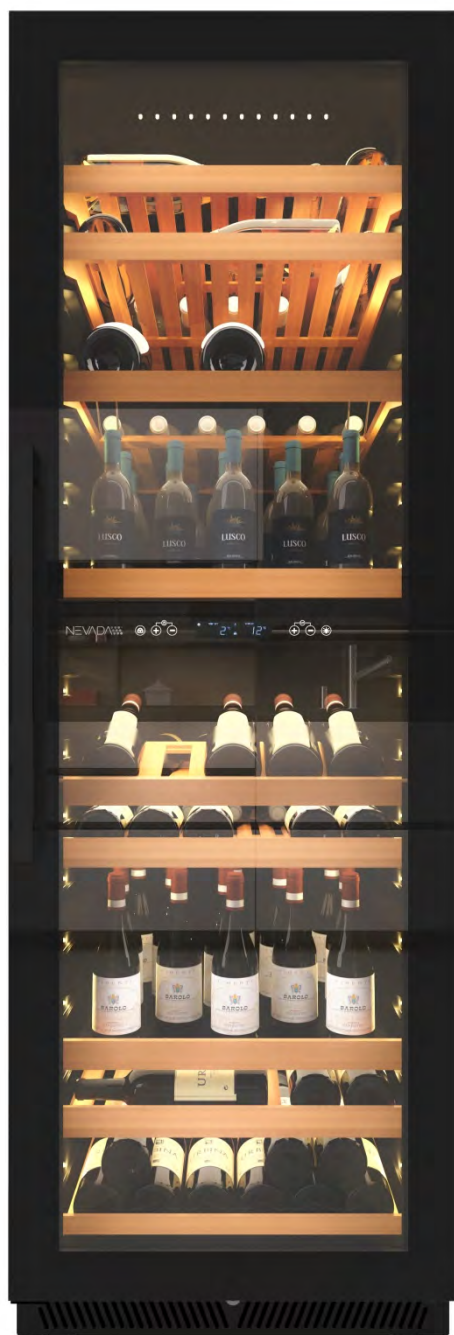

OPTIONAL ADDITIONAL EQUIPMENT OPTIONAL S | List € 540

Capacity Approx.	Capacity for about 150 bottles
	Approx. 180 (75 Cl. Bordeaux type)
No. Internal Shelves	8 Sliding shelves
Shelves	4 Wooden shelves for Pouring
Shelves Type	4 Wooden Storage Shelves

Thanks to the **Optional Kit S** specifically for the Single Temperature version, it allows to increase the capacity of the wine cellar by adding 8 Internal Shelves to the standard equipment, the capacity increases from approx. 150 bottles to approx. 180 Bottles.

The VINUMdesign® wine cellar collection was created to meet the needs of the **HO.RE.CA.** world.

The new VINUMdesign® wine cellar collection is a jewel of high class and elegance. The special attention paid to aesthetics, low energy consumption, compact size, and attention to every detail make VINUMdesign® wine cellars suitable for any environment, whether for domestic or professional use.

The **Inner Shelves** are equipped with a **black front batten**, with which you can **note e.g.**, the origin, grape variety or vintage of the wine. Thanks to the water-based marker pen, which is provided, the writing on the batten can be easily erased.

All the **interior Shelves** are made of **fine wood** and offer a variety of uses, so you can always store your wine in the best possible way.

Thanks to **telescopic guides**, the shelves are easily removable, making it easier to insert and remove bottles.

Always well-lit interior thanks to the white **LED interior light** with double **vertical full-height light emission**, the bottles will always remain so well visible.

Full Glass Black Door with Square Black Handle

UV Rays are harmful, they can cause chemical reactions in wines, so the Door is equipped with a **Triple Low-Emission Glass w/Argon gas** so as to better protect your wines.

Wooden Shelf for **Pouring**

The new **multi-purpose wooden shelf** allows maximizing the capacity of bottles inside. It allows use both for storing wine horizontally and if necessary, by tilting the slats, transforming it into a wine-mixing shelf.

Fixed Metal **Service** Shelf

The Fixed Metal Service Shelf allows a large number of bottles to be arranged vertically. Ideal for keeping bottles that will be used during service within easy reach.

Professional performance thanks to the advanced control with **LED Touch Display** that allows you to easily manage the internal temperature.

The New VINUMdesign® wine cellars designed especially for the professional world as well are available in Mono or Double temperature **adjustable from a minimum of 3°C to a maximum of 20°C** so you can always store your wine at the correct temperature.

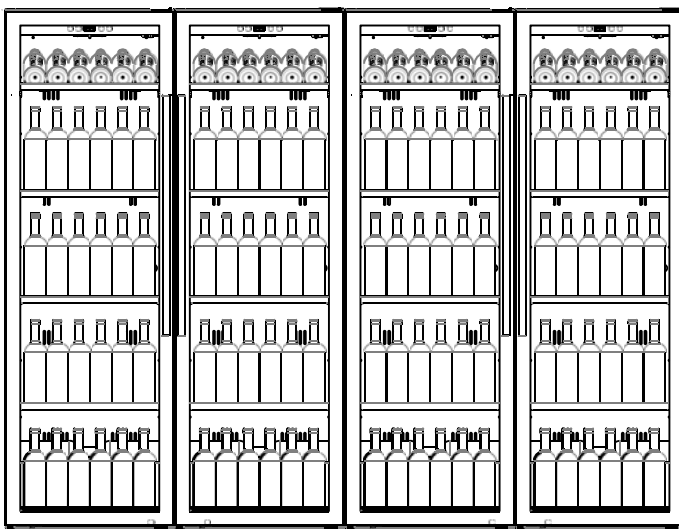

The new VINUMdesign® wine cellars can also be placed in **Living rooms** due to their quietness of only 38 db.

Equipped with **Inverter compressors**, in addition to being quiet, they are also very efficient with low consumption of only 133 Kwh/year in energy class **F**.

Protecting a collection of fine wines is a great responsibility, which is why the new VINUMdesign® wine cellars are equipped with a key lock. Placed at the bottom, the lock is very discreet and almost invisible, leaving the design of the door untouched.

NVD180-160S-BFG-L + NVD180-160S-BFG-R

Specifically designed to meet the demands of the **HORECA** world, the new free-standing wine cellars make the most of the internal capacities, accommodating up to 160 bottles of 75 Cl. Bordeaux type.

With the new VINUMdesign® wine cellars, it is possible to create customized configurations according to one's needs by combining one or more wine cellars, thus creating walls of the desired width and number of temperature zones.

Configuration example:

640 BottLES 4 Temperatures - Width 246 cm:

1 | NVD180-160S-BFG-L List € 3.100

1 | NVD180-160S-BFG-R List € 3.100

Installation: Free-Standing

Capacity Ca.	Capacity approx. 320 bottles (75 Cl. Bordeaux type)
Control Type	Advanced Computer, Soft Touch, Display LED
No. of Zones Temp.	Double Temperature
Right Zone Temp.	Adjustable from 3 20°C
Left Zone Temp	Adjustable from 3 20°C
No. of Internal Shelves	10 Sliding Shelves on Telescopic Guides
Type of Shelves	8 Service Shelves
	2 Wooden shelves for Pouring
Internal Lighting	White LED Light Double Vertical Emission
Filter	Double Activated Carbon Filter
Door Finish	Black Full Glass
Door Insulation	Triple Low-Emission Glass w/ Argon Gas
Handle	Black Squared
Security	Lock with key
Compressor	Inverter 220-240 V; 50Hz - 60Hz; Gas R600a
Energy Class	F Climatic ST
Consumption Kwh Year	133 KWh year
Quietness	38dB
Door Reversibility	Mirror opening non-reversible
Measures (HxLxP) Cm	Product 2x 186,7x59,5x69,8
	Packaging 2x (HxLxP) cm: 192x65,5x76
Product Weight	Weight 2x Net Gross: 90 97 kg

Wooden Shelf for Pouring With Customizable Insert

Fixed Metal Service Shelf With Customizable Insert

H 93 cm

STANDARD VENTILATION	TRIPLE ANTI UV GLASS	ANTI-VIBRATION SYSTEM	ENERGETIC CLASS F	NO HANDLE

● NO. OF BOTTLES:

The maximum capacity is expressed in No. of "Standard Bordeaux" type bottles. The number of bottles shown in the catalog takes as reference the 750-ml Classic Bordeaux type (sizes H 30mm and Ø 70 mm.) Any other type of bottle modifies the capacity .

All wooden shelves are removable and removable so that there is more space to hold any large bottles such as magnums or bottles with unconventional shapes.

THRILL®

THRILL[®]

THRILL THE BEST SOLUTION FOR SANITIZING AND REFRIGERATING GLASSES INSTANTLY

Deep sanitization, in seconds, keeps drinks fresh for a long time without watering them down. Cold glass sanitization is crucial not only from a strictly hygienic point of view. Invisible post-wash residues can corrupt the flavors and odors of beverages, compromising the quality of the served product.

CO2 CONSUMPTION TABLE

You can cool glass or plastic containers of any size: small, medium, large and very large :

Measure		Sanitizes and cools	Sanitizes and freezes
Small Size		2 Sec. 1 SHOT (10 gr)	4 Sec. 2 SHOT (20 gr)
Medium Size		3 Sec. 1 SHOT (15 gr)	5 Sec. 2 SHOT (25 gr)
Large Size		3 Sec. 1 SHOT (15 gr)	9 Sec. 3 SHOT (40 gr)
Very Large Size		5 Sec. 1 SHOT (25 gr)	10 Sec. 2 SHOT (50 gr)

ANALYSIS OF THE UNIVERSITY OF UDINE

Summary table of the analysis performed with comparison of contamination of treated and untreated surfaces.

Inoculated microorganism	Non-treated glass	Treated glass
Salmonella enteritidis	9×10^2	$< 1 \times 10^2$ (> 88 %)
Staphylococcus aureus	6×10^2	$< 1 \times 10^2$ (> 83 %)
Escherichia coli	8×10^2	$< 1 \times 10^2$ (> 87 %)
Penicillium nalgioense	2×10^2	1×10^2 (> 83 %)
Listeria innocua	5×10^2	1×10^3 (80 %)
Pseudomonas putida	3×10^2	1×10^5 (> 66 %)
Brettanomyces bruxellensis	2×10^2	$< 1 \times 10^2$ (> 50 %)

CO2 CYLINDER | **BUY AND REFILL** your cylinder straight to your door

The service allows the end consumer to purchase | refill the cylinder directly at home.

Operated with returnable vacuum and refillable through refill service that can be purchased as indicated on the website www.nevadaeurope.com/shop-bombale

BUILT-IN GLASS FREEZER
VORTEX F1 SBI INOX | List € 1.800 Δ
Installation: Built-in Flush

Type Of Control	Physical operation key
Electronic	Tropicalized electronics for outdoor use
Built-in Base	Insertion from bases 25 cm wide
Finish	100% Brushed Stainless Steel
Refrigerant Gas	CO ₂ E290
Cylinder Type	CO2 cylinder with dip tube (not included)
CO2 tube length	Mt. 2.80 (including solenoid valve connection)
Power supply	Rechargeable battery from 12 V-100/240v AC Plug
Mains voltage	100-240 V ~ AC
Frequency	50-60 Hz
Maximum power	50 W
Accessories	Floor mounting kit and Battery charger included
Visible plane dimensions	cm 22 x 22
Recessed hole	cm 19,5 x 19,5
Depth from plane	cm 20 with battery cm 13 without battery
Quietness	37dB
Product Weight	4,5 kg with battery 3 kg approx. without battery

In case of using ERT extension cord, please order prepared version

Code: VORTEX F1 SBI INOX ERT

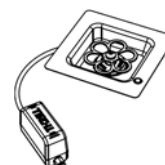

BUILT-IN GLASS FREEZER
VORTEX F1 SBI PVD BLACK | List € 2.150 Δ
Installation: Built-in Flush

Type Of Control	Physical operation key
Electronic	Tropicalized electronics for outdoor use
Built-in Base	Insertion from bases 25 cm wide
Finish	PVD Black
Refrigerant Gas	CO ₂ E290
Cylinder Type	CO2 cylinder with dip tube (not included)
CO2 tube length	Mt. 2.80 (including solenoid valve connection)
Power supply	Rechargeable battery from 12 V-100/240v AC Plug

MOBILE GLASS FREEZER
VORTEX TOWER INOX | List € 6.000 **Δ**
Installation: Free-Standing

Type Of Control	Physical operation key
Electronic	Tropicalized electronics for outdoor use
Positioning	Mobile, transportable anywhere on wheels
Finish	Brushed Stainless Steel IROKO Wooden Top
Interchangeable accessories	Glass and basket holder
Refrigerant Gas	CO ₂ E290
Cylinder Type	CO ₂ cylinder with dip tube (not included)
Power supply	12 V-100/240v AC Plug Rechargeable Battery
Mains voltage	100-240 V ~ AC
Frequency	50-60 Hz
Maximum power	50 W
Security	Cylinder compartment with sealing straps
Mieasures (HxLxp) Cm	102 x 52 x 40 without 83 with accessories
Wheels	4 stainless steel wheels with wear-resistant rubber
Product Weight	38 40 kg excluding cylinder (not included)
